Professional Summary

Full-Stack Software Engineer with 4 years of experience building web and backend systems using Python, JavaScript, and TypeScript, with hands-on experience in AI evaluation, automation microservices, and data processing. Skilled in developing RESTful APIs, integrating external services, and building AI-assisted applications using LLM frameworks.

Skills

Languages: Python, JavaScript, TypeScript
AI & Data: Pandas, NumPy, TensorFlow, LangChain, Prompt Engineering, LLM Evaluation (accuracy, bias, safety), Machine Learning Fundamentals
Backend: FastAPI, Node.js, REST APIs, Micro-services
Databases: PostgreSQL, MySQL, MongoDB
DevOps & Tools: Docker, Git, GitHub Actions, CI/CD, Postman, Swagger
Frontend: React, React Native, Next.js, Tailwind CSS, Shadcn/ui

Professional Experience

Outlier AI — JavaScript Developer (Remote) (Jul. 2025 – Present)
• Evaluated large language model (LLM) outputs for reasoning accuracy, bias, and safety using structured prompt testing frameworks.
• Built rubric-based human-in-the-loop evaluation workflows to assess AI model reliability.
• Identified failure patterns and documented vulnerabilities improving model robustness.

Micronetbd Inc. — Application Developer (Dhaka, BD) (Nov. 2024 – Jun. 2025)
• Developed Python microservices to automate workflows and integrate Salesforce APIs.
• Built cross-platform mobile applications using React Native and Expo.
• Implemented RESTful APIs and ensured data consistency across enterprise platforms.

SSL Wireless — Software Specialist (Dhaka, BD) (May 2021 – Apr. 2023)
• Engineered real-time analytics dashboards and secure backend APIs for SaaS products.
• Built a live sales monitoring system reducing manual bookkeeping effort.
• Optimized data pipelines using PostgreSQL and MongoDB for business intelligence.

Education

Bachelor of Science in Computer Science and Engineering
North South University, Dhaka, Bangladesh
(2014 – 2018)

Projects

1. AI Detection & Alert System (University Thesis)

• Built a real-time computer vision system using Python, TensorFlow, Pandas, and NumPy to detect fire, smoke, and human presence from live camera feeds.
• Developed preprocessing and evaluation pipelines to improve detection accuracy.
• Integrated Twilio APIs to trigger automated real-time alerts for rapid response.
